Solve the Diophantine equation $x^2+2y^2=5z^2$ Solve the Diophantine equation $x^2+2y^2=5z^2$ Question: I'm looking for a lot of help on this question, I was given this question in class and we were not quite sure how to start or

what to do. So any help/advice would be greatly appreciated. My idea was that this is a Pell Equation and could maybe use the Golden Triples, but we weren't quite sure where to go from there. Please help! Thank you! A: Hint: $\frac{x^2+2y^2}{5}=\frac{x^2}{5}+\frac{2y^2}{5}=\frac{x^2}{5}+\frac{2z^2}{5}$. Q: How to inspect backported

Cisco switches, if any? Can I inspect/inspect any of the backported Cisco IOS/EOS versions that are in place on my network devices today? Are there any special tools that I can use to find these backport packages? A: I recently had to do this on a Cisco 2600 device that was upgrading to a new platform. What you need is to find Cisco, and you can find Cisco's toolstacks here: Cisco specifically developed their own toolstacks for this type of thing. Specifically, they use these stacks from the image of the base OS in the form of ISSUES and their own processing steps to backport certain versions/releases of their OS.
